

Khandaker Amirul Islam

Backend Developer | DevOps Enthusiast | AI Researcher

Email: amirul.islam@example.com | LinkedIn: linkedin.com/in/khandaker-amirul-islam-092aa9344 | GitHub: github.com/Amirul8210

Education

B.Sc. in Computer Science and Engineering

United International University

CGPA: 3.78

Focus: Backend Systems, Artificial Intelligence, Network Security

Technical Skills

Languages: Python, Go, JavaScript/TypeScript, SQL

Backend Frameworks: Flask, FastAPI, Node.js, Next.js

DevOps & Cloud: Docker, Git, CI/CD, Linux, Basic Cloud Infrastructure

Tools: Terminal, REST APIs, Database Management (PostgreSQL, MongoDB)

Profile

Dedicated Computer Science and Engineering student with a strong problem-solving mindset. Specialized in the Python ecosystem, crafting robust APIs and scalable backend architectures. Deeply interested in the operational side of software—specifically DevOps, cloud automation, and infrastructure engineering. Actively participates in research-oriented software projects and competitive project showcases.

Projects

Backend API Systems

- Developed RESTful APIs using FastAPI and Flask.
- Implemented robust authentication and database schemas.

AI & Machine Learning Research

- Participated in AI research and built machine learning models.
- Integrated AI models into backend services for real-time predictions.

Interests

- Backend System Architecture
- DevOps Automation
- Artificial Intelligence
- System and Network Security
